Wide Partisan Differences over the Issues that Matter in 2014

GOP Continues to Hold Engagement Advantage

Heading into the final weeks before the midterm elections, Republican and Democratic voters are split not only over their candidate preferences, but also about the importance of key issues in the election.

Foreign policy, the budget deficit and immigration are among the most dominant issues for those planning to vote for Republican candidates; each is named by 70% or more as “very important” to their vote in the fall. But only about half of those who plan to vote Democratic say each of these issues are very important to their vote decisions.

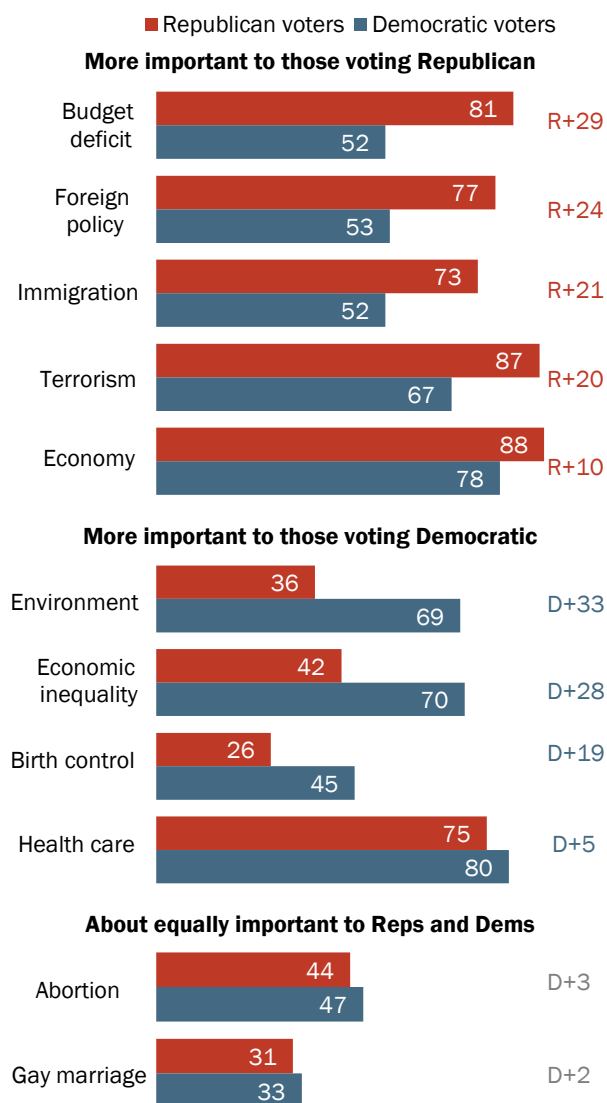

In contrast, both the environment and economic inequality rate as very important to about seven-in-ten Democratic voters—but no more than about four-in-ten Republicans.

The latest national survey by the Pew Research Center, conducted Sept. 2-9 among 2,002 adults (including 1,552 registered voters), finds that terrorism and the economy are top issues for both Republican and Democratic voters, though in both cases they rate as more important for Republicans than Democrats.

Health care also remains a key issue for voters in both parties this fall, with 77% saying it is very important to their vote. Democratic voters are more likely than Republican voters

PEW RESEARCH CENTER

(80% vs. 75%) to say health care will be very important to their vote in November.

Overall, opinions of the Affordable Care Act have changed little over the past year. Currently, 44% approve of the law, while 52% disapprove.

The survey also finds that [voters who support GOP candidates continue to be more engaged with the midterm election than those who support Democrats](#). Republican voters are 15 points more likely than Democrats to say they've given a lot of thought to the election, and 12 points more likely to say they definitely will vote. GOP voters also express more enthusiasm for voting in the upcoming midterm than their Democratic counterparts.

As a result, while the so-called "generic ballot" slightly favors the Democrats (47% of voters say they plan to vote for the Democratic candidate or lean toward the Democrat, while 42% say they plan to vote for the Republican or lean Republican), the likely electorate is more favorable to Republican candidates than the overall electorate. When the generic ballot is narrowed to a subset of voters most likely to cast votes in November (1,150 likely voters), the result is more divided: 44% support the Democratic candidate, 47% support the Republican candidate.

At a comparable stage in 2010, Republicans held a 50%-43% lead among likely voters. [In the Pew Research Center's final pre-election survey in 2010](#), Republicans held a 48% to 42% advantage.

The internal dynamics of the race are similar to the 2010 campaign. The GOP performs strongest among whites, men, older voters and evangelical Protestants, while Democratic candidates garner more support from non-whites, women, younger voters and the religiously unaffiliated.

PEW RESEARCH CENTER

There are also wide differences in vote preferences by education: Those with post-graduate degrees are currently the only educational group to favor Democratic candidates for Congress, and they do so by a 19-point margin (58% vs. 39%). And while Democrats hold a 20-point advantage among low-income voters (55% to 35% among voters with family incomes under \$30,000), the Republicans lead among middle-income voters (\$30,000-\$75,000) by 10 points (51% to 41%).

Issue Priorities for Voters

The economy continues to be the top issue for voters, as it has been over the last several election cycles. Today 83% say that the economy will be very important to their vote—in 2010, fully 90% of voters said this. Health care also remains a priority: 77% say it will be very important to their vote, which is identical to the share saying this in [August 2010](#), a few months after the passage of the Affordable Care Act.

Three-quarters of voters (75%) say the issue of terrorism will be very important to their vote, little changed from about the same point in the 2010 campaign (71%). In September 2012, shortly before the presidential election, 60% of voters said terrorism would be very important. ([The current survey](#) finds that concerns over Islamic extremism have risen sharply in recent years; it was conducted before President Obama's Sept. 10 address on expanding U.S. military action against the militant group known as ISIS).

Majorities also view the budget deficit (65%), foreign policy (64%), immigration (62%) and economic inequality (57%) as very important to their vote. Two social issues — gay marriage and birth control — rank lower on the importance list; only about a third of voters say each will be very important to their vote this fall (36% birth control, 32% gay marriage).

Based registered voters.

PEW RESEARCH CENTER

Age, Gender Differences in Priorities

Foreign policy and immigration rate as much more important issues for older voters than younger voters. About seven-in-ten voters 65 and older (71%) view foreign policy as very important to their vote, as do about as many of those 50 to 64 (70%). Among voters younger than 30, only about half (51%) say this.

Similarly, just 49% of voters under 30 rate immigration as a very important issue. Nearly seven-in-ten (69%) of those 65 and older and 65% of voters 50 to 64 view immigration as very important.

There also are racial and ethnic differences in views of immigration as a voting issue: 70% of Hispanic voters say immigration is very important, compared with 63% of whites and 46% of blacks.

Young voters are much more likely than older voters to consider the environment when casting their ballots: 64% of 18-29 year old voters say this will be very important to their vote, compared with only about half (51%) of voters 50 and older.

Older Voters More Likely to Prioritize Foreign Policy, Immigration

% of registered voters saying each is "very important" to their vote for Congress

	18-29	30-49	50-64	65+	Young-old diff

Survey conducted September 2-9, 2014. Based on registered voters.

PEW RESEARCH CENTER

Women are more likely than men to rate several issues as very important, particularly issues of health care and reproduction. For example, while more than half of women voters (55%) say abortion will be very important in their decision this fall, just 37% of men voters say this. And although birth control is not a dominant issue for either men or women, women are much more likely to say it is very important: 44% say this, compared with 27% of men.

More generally, health care is also more likely to be seen as important by women: 84% of women voters say health care will be very important to their vote this fall, 70% of men voters say the same.

Women also are more likely to view economic inequality as an important contributor to their vote choice: 64% say it is very important, compared with 49% of men.

PEW RESEARCH CENTER

ACA Remains Unpopular; More See Law's Impact on Country

Among the public overall, opinions about the 2010 health care law have changed little over the past year. Currently, 52% disapprove of the health care law while 44% approve of the measure.

More people say the law has had an impact on the country than did so a year ago. On balance, the law's effects continue to be seen as more negative than positive. Today, 45% say the law has had a mostly negative effect on the country, while 33% think its impact has been mostly positive; 18% say it has not had much of an effect. Last September, 38% said the law's impact on the country was mostly negative, 24% said it was positive; 31% said it had not much of an impact.

A majority (54%) continues to say the health care law has not had much of an effect on themselves or their families, though somewhat fewer say this than did so a year ago (63%). Currently, about one-in-four (26%) see the health care law's personal effect as mostly negative, while 19% say it has been mostly positive.

The public also continues to express more negative than positive views about the law's future impact – both personally and on the country. Currently, 46% say that over the coming years the impact of the law on the country will be mostly negative, 37% anticipate a mostly positive effect and 13% do not think that the law will have much impact going forward. In terms of the law's future personal impact, 38% expect it will be mostly negative, 27% mostly positive, while a third (33%) say it will not have much of an effect.

More Are Seeing the Health Care Law's Impact; Negatives Outweigh Positives

PEW RESEARCH CENTER

More Democrats have a positive view of the health care law's impact on the country than did so a year ago. Currently, 56% say the law has had a positive effect, up 15 points from last September. The share saying the law has had a negative effect has held fairly steady (at 22%), while fewer Democrats say it has not had much of an effect.

College graduates also view the law's impact more positively. Today, about as many college graduates view the law's effect on the country as mostly positive (41%) as mostly negative (42%). A year ago, the balance of opinion among college graduates was more negative than positive (38% mostly negative, 23% mostly positive).

Among many other groups, however, there has been no improvement in opinions about the law's impact on the country. For instance, those who have only some college experience still view its effects more negatively than positively (48% mostly negative vs. 30% mostly positive) as do those with no more than a high school education (30% vs. 44%).

Familiar Divisions in Views of ACA

The health care law continues to draw more support from non-whites than from whites, and from more young adults than older people.

While 61% of non-Hispanic whites disapprove of the law, majorities of non-Hispanic blacks (73%) and Hispanics (60%) approve of it. Among people under 30, more approve (55%) than disapprove (41%) of the law; among older age groups, there is more opposition than support.

Democrats continue to approve of the law by a wide margin (72%-23%), but Republicans oppose it by an even larger margin (88%-11%). These partisan differences carry over into midterm vote preferences: 90% of registered voters who support the Republican in their district disapprove of the health care law, while 73% of those who plan to vote Democratic approve of it.

About the Survey

The analysis in this report is based on telephone interviews conducted September 2-9, 2014 among a national sample of 2,002 adults, 18 years of age or older, living in all 50 U.S. states and the District of Columbia (801 respondents were interviewed on a landline telephone, and 1,201 were interviewed on a cell phone, including 673 who had no landline telephone). The survey was conducted by interviewers at Princeton Data Source under the direction of Princeton Survey Research Associates International. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Survey Sampling International. Interviews were conducted in English and Spanish. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older. For detailed information about our survey methodology, see <http://people-press.org/methodology/>

The combined landline and cell phone sample are weighted using an iterative technique that matches gender, age, education, race, Hispanic origin and nativity and region to parameters from the 2012 Census Bureau's American Community Survey and population density to parameters from the Decennial Census. The sample also is weighted to match current patterns of telephone status (landline only, cell phone only, or both landline and cell phone), based on extrapolations from the 2013 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size among respondents with a landline phone. Sampling errors and statistical tests of significance take into account the effect of weighting.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

Group	Unweighted sample size	Plus or minus ...
Total sample	2,002	2.5 percentage points
Republican	540	4.9 percentage points
Democrat	637	4.5 percentage points
Independent	733	4.2 percentage points
Registered voters	1,552	2.9 percentage points
Republican RVs	463	5.3 percentage points
Democratic RVs	512	5.0 percentage points
Independent RVs	516	5.0 percentage points
<i>House vote choice</i>		
Support Rep candidate	701	4.3 percentage points
Support Dem candidate	702	4.3 percentage points
Likely voters	1,150	3.3 percentage points
Republican LVs	381	5.8 percentage points
Democratic LVs	363	5.9 percentage points
Independent LVs	368	5.9 percentage points

Sample sizes and sampling errors for other subgroups are available upon request.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

³

In the Aug 25-Sep 6, 2010 survey, a wording experiment was conducted with one half of respondents asked the question wording shown above, and the other half was asked: "Some people seem to follow what's going on in government and public affairs most of the time, whether there's an election or not. Others aren't that interested. Would you say you follow what's going on in government and public affairs ...?" No significant differences were found between questions and the combined results are shown above. All surveys prior to Sep 2010 used the longer question wording.

NO QUESTIONS 9-12

⁷ In October, 1994 Gallup asked "Compared to previous elections..." and did not specify congressional elections.

ASK ALL:

Q.13 As you think about the elections for Congress this November, how important are each of the following issues to you. Is the issue of **[INSERT ITEM; RANDOMIZE]** very important, somewhat important, not too important, or not at all important? How about **[SECOND ITEM]**? As you think about the elections for Congress this November, is the issue of **[SECOND ITEM]** very, somewhat, not too, or not at all important to you? And, how about **[NEXT ITEM]**? **[IF NECESSARY: As you think about the elections for Congress this November, is the issue of [ITEM] very, somewhat, not too, or not at all important to you?]** **[INTERVIEWER: PLEASE RE-READ RESPONSE OPTIONS AS NECESSARY TO REMIND RESPONDENTS OF OPTIONS. IF RESPONDENT VOICES THEIR SUPPORT OR OPPOSITION TO AN ISSUE, CLARIFY: "this question is not about your position on each issue, just how important each issue will be to your vote."]**

BASED ON REGISTERED VOTERS [N=1,552]:

Jul 8-11, 2010	35	47	17
Apr 1-5, 2010	40	44	16

NO QUESTION 60**ASK ALL:**

Q.61 So far, that is up until today, has the health care law had a mostly positive, mostly negative, or not much of an effect on you and your family?

		(U) <u>Apr 3-6</u> <u>2014</u>	(U) <u>Dec 3-8</u> <u>2013</u>	(U) <u>Sep 4-8</u> <u>2013</u>
Sep 2-9 <u>2014</u>				
19	Mostly positive	17	15	17
26	Mostly negative	24	23	20
54	Not much of an effect	57	60	63
1	Don't know/Refused (VOL.)	2	2	1

⁹ Prior to September 2013, the question asked about "the health care legislation." In addition, the reference to when the law was passed has changed over time: January 2011 referenced the legislation passed "last year," November 2010 used "earlier this year," September through July, 2010 used "in March," and April 2010 used "last month."

ASK ALL:

Q.62 And looking ahead, do you think the overall effect of the health care law on you and your family over the coming years will be mostly positive, mostly negative, or will it not affect you much either way?

		(U) Apr 3-6	(U) Dec 3-8	(U) Sep 4-8
Sep 2-9				
<u>2014</u>		<u>2014</u>	<u>2013</u>	<u>2013</u>

¹⁰ In the February 2-7, 2011, survey and before, question read "...do you strongly agree, agree, disagree or strongly disagree with the Tea Party movement..." In October 2010 and earlier, question was asked only of those who had heard or read a lot or a little about the Tea Party. In May 2010 through October 2010, it was described as: "the Tea Party movement that has been involved in campaigns and protests in the U.S. over the past year." In March 2010 it was described as "the Tea Party protests that have taken place in the U.S. over the past year."
