Pew Research Center, October, 2018, "2018 Midterm Voters: Issues and Political Values"

## About Pew Research Center

Pew Research Center is a nonpartisan fact tank that informs the public about the issues, attitudes and trends shaping America and the world. It does not take policy positions. It conducts public opinion polling, demographic research, content analysis and other data-driven social science research. The Center studies U.S. politics and policy; journalism and media; internet, science and technology; religion and public life; Hispanic trends; global attitudes and trends; and U.S. social and demographic trends. All of the Center's reports are available at [www.pewresearch.org](http://www.pewresearch.org). Pew Research Center is a subsidiary of The Pew Charitable Trusts, its primary funder.

# 2018 Midterm Voters: Issues and Political Values

*Huge partisan divides on health care, immigration, U.S. global role*

Supporters of Republican and Democratic candidates in the upcoming congressional election are deeply divided over the government's role in ensuring health care, the fairness of the nation's economic system and views of racial equality in the United States.

And these disagreements extend to how the U.S. should approach allies and whether or not other countries "often take advantage of the United States."

The latest national survey by Pew Research Center, conducted Sept. 18-24 among 1,754 adults, including 1,439 registered voters, finds wide differences in the views of Republican and Democratic voters across 13 different issues and policy areas, though the size of the partisan gaps vary.

An overwhelming majority of registered voters who support Democratic candidates for

PEW RESEARCH CENTER

Congress this November (85%) say that it is the responsibility of the federal government to make sure all Americans have health care coverage. In contrast, only a quarter of Republican voters (24%) say this is the government's responsibility, while nearly three times as many (73%) say it is not. (*For more on Americans' views of the government's role in providing health care, see "[Most continue to say health care coverage is government's responsibility](#)".*)

The partisan gaps on many of these values and issues are in line with those seen in previous Pew Research Center reports, including in [last year's major report on trends in the public's political values](#). That study found that the partisan gaps across a number of political values – especially on race and immigration – have widened over the past decade. In the new survey, 85% of Democratic voters say the country needs to continue to make changes to give blacks equal rights with whites, compared with 29% of Republican voters.

There also are significant gaps on views of whether abortion should be legal, the factors that make people rich and poor and the fairness of the U.S. economic system.

Two specific Trump-era policies – increased tariffs between the U.S. and its trading partners, and the 2017 tax bill – are viewed much more positively by GOP voters than by Democratic voters. Overall views of the tax law remain largely unchanged from early this year: In the new survey, 78% of voters who support the GOP candidate in their district approve of the tax law, compared with just 11% of Democrats.

And the partisan differences are about as wide in views of the Trump administration's decision to increase tariffs on imported goods from a number of countries. Nearly three-quarters of GOP voters (72%) say increased tariffs will be good for the United States, about five times the share of Democratic voters who support higher tariffs (14%).

Looking at voters' priorities for immigration policy, there is some common ground among partisans. When asked whether the policy priority should be "creating a way for immigrants already here illegally to become citizens if they meet certain requirements," or "better border security and stronger enforcement of our immigration laws" – or whether both should be given equal priority – nearly half of Republican voters (48%) and about as many Democratic voters (45%) say both should be given equal priority.

Still, far more Democratic voters (49%) than Republican voters (11%) say the priority should be on creating a way for those in the U.S. illegally to become citizens if they meet certain conditions. By contrast, far more Republican voters (39%) than Democratic voters (5%) say the focus should be on better border security and enforcement.

(For more on how voters view the importance of immigration, health care, taxes, trade and other issues, see ["Voter Enthusiasm at Record High in Nationalized Midterm Environment."](#))

### On immigration, nearly half of voters prioritize both a path to citizenship and better border security

PEW RESEARCH CENTER

## Shifting priorities for dealing with illegal immigration

Since 2016, the share of adults in the general public who say border security should take priority over creating a way for those in the country illegally to become citizens has decreased. Two years ago, about a quarter (24%) said stronger law enforcement should be the priority for dealing with illegal immigration. Today, about two-in-ten (19%) say this.

During that same period, the share who prioritize creating a pathway for illegal immigrants to gain citizenship has increased modestly – from 29% in 2016 to 33%.

### More Democrats say the priority for immigration policy should be a path to citizenship for those here illegally

% who say the priority for dealing with illegal immigration in the U.S. should be ...

- Better border security & stronger enforcement of immigration laws
- Creating a way for immigrants already here illegally to become citizens if they meet certain requirements
- Both given equal priority

Note: Don't know responses not shown. Based on general population.

Source: Survey of U.S. adults conducted Sept. 18-24, 2018.

PEW RESEARCH CENTER

A plurality (46%) continue to say that both of these should be given equal priority.

Today, significantly more Republicans say *both* border security and legal pathway should be given equal priority (48%) than say the priority should be border security (38%), a shift from recent years.

About half of Democrats and Democratic leaners (51%) now say creating a way for immigrants who are currently here illegally to become citizens should be prioritized – the largest share saying this since the question was first asked in August 2010; 43% say border security and a pathway to

citizenship should be given equal priority. Just 5% say border security should take the higher priority.

There are large demographic differences within the general public on priorities in dealing with illegal immigration.

Women are much more likely to prioritize a legal pathway to citizenship than men (40% to 27%).

Though a plurality of whites say both should be equally prioritized, whites (23%) are far more likely than blacks (6%) and Hispanics (9%) to say better border security should take priority.

About half of Hispanics (47%) say a pathway for legal citizenship should be the priority, while 43% say both should be equally prioritized. Among blacks, 53% say both should be equal priorities, while 37% say the priority should be creating a way for those in the country illegally to become citizens.

Republicans are more likely than Democrats to prioritize stronger law enforcement, while Democrats are more likely to prioritize a path to citizenship for those currently in the U.S. illegally.

## On immigration priorities, divides between and within parties

*% who say the priority for dealing with illegal immigration in the U.S. should be ...*

Notes: Whites and blacks include only those who are not Hispanic; Hispanics are of any race. Don't know responses not shown. Source: Survey of U.S. adults conducted Sept. 18-24, 2018.

PEW RESEARCH CENTER

## Americans' views of relationships with other nations

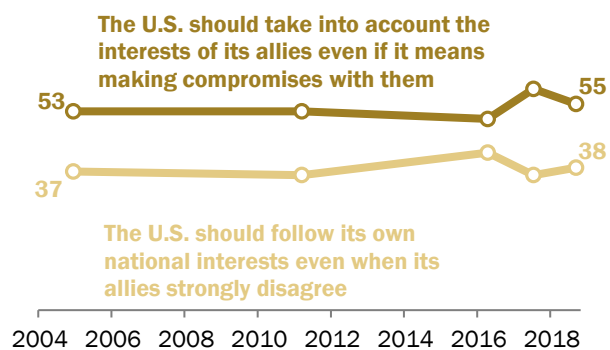

A majority of Americans (55%) continue to say that the U.S. should take into account the interests of its allies in foreign policy, even if it means making compromises with them. Fewer say the U.S. should follow its own national interests, even when its allies strongly disagree (38%).

Since 2017, the public has become slightly less likely to say compromising with allies is preferable (59% then, 55% now). This downtick is also more in line with opinions measured in years prior to 2017.

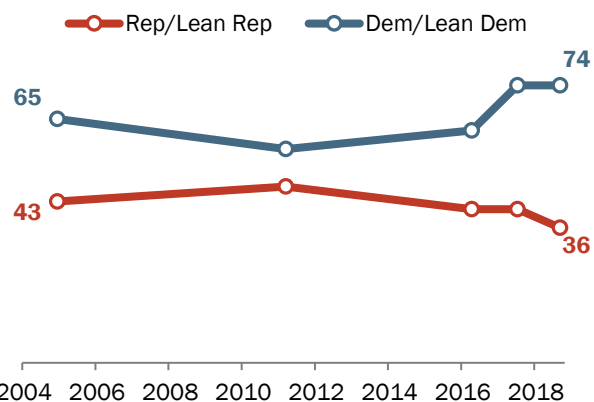

As was true a year ago, Republican and Democratic views differ. Currently, a 38-percentage-point gap separates partisans on whether the U.S. should take into account the interests of allies – one of the largest partisan gaps measured in the past 15 years.

### Stark partisan divide in views of cooperation with U.S. allies

*% who say that in foreign policy ...*

*% who say the U.S. should take into account the interests of its allies, even if it means making compromises*

Note: Don't know responses not shown.

PEW RESEARCH CENTER

On balance, more adults say that other countries often take unfair advantage of the U.S. (51%) than say that other countries treat the U.S. about as fairly as we treat them (42%). In the 1990s, Americans were much more likely to view other countries' treatment of the U.S. as unfair than they are today.

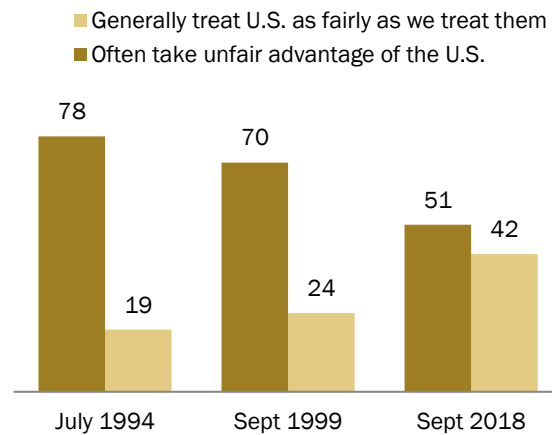

When the question was last asked nearly two decades ago, 70% said that other countries take advantage of the U.S. while just 24% said that other countries treat the U.S. with mutual fairness.

These changes are largely attributable to a shift in views among Democrats and Democratic leaners. In 1999, about two-thirds of Democrats (68%) said other countries often take unfair advantage of the U.S.; just 28% say that today. By comparison, 80% of Republicans now say that other countries take unfair advantage (up from 73% in September 1999). As a result, today there is a wide divide between Republicans and Democrats in these views, when there had been little partisan difference in the 1990s.

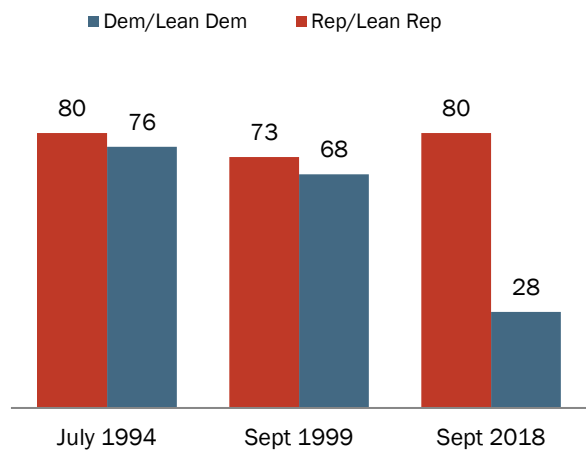

Among both parties, there are ideological divisions in these views. Conservative Republicans are more likely than moderate and liberal Republicans to say there is unfair treatment (85% to 67%, respectively). Liberal Democrats are more likely than conservative or moderate Democrats to say other countries treat the U.S. fairly (75% vs. 57%).

## Fewer say other countries 'take unfair advantage' of U.S. than in the 1990s

*% who say that other countries ...*

*% who say that other countries often take unfair advantage of the United States*

Note: Don't know responses not shown.

PEW RESEARCH CENTER

## Opinions on tariffs, tax bill little changed

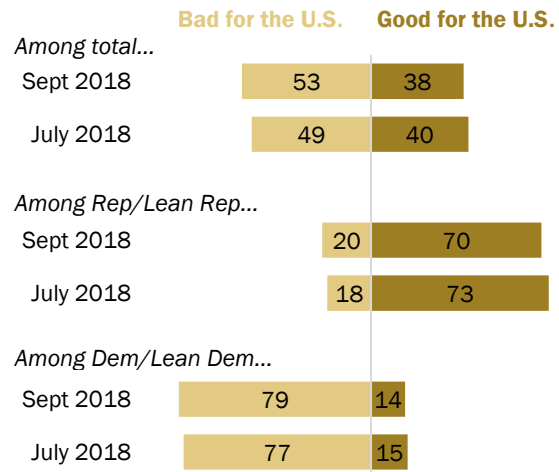

Overall, the public continues to say that increased tariffs between the U.S. and its trading partners – first imposed by the Trump administration earlier this year – will be bad for the country.

In July, roughly half of the public said they thought increased tariffs would be bad for the U.S. Today, a similar share also says this (53%).

Partisans continue to hold opposing views on this policy; 70% of Republicans say they think tariffs will be good for the U.S. Conversely, nearly eight-in-ten Democrats (79%) say they will be bad for the U.S.

### More continue to say increased tariffs will be bad than good for the U.S.

*% who think increased tariffs between the U.S. and its trading partners will be ...*

Note: Don't know responses not shown.

Source: Survey of U.S. adults conducted Sept. 18-24, 2018.

PEW RESEARCH CENTER

Nine months after passage of the Tax Cuts and Jobs Act, views of the sweeping tax law are little changed. More say they disapprove (46%) rather than approve (36%) of the law; about two-in-ten adults (18%) do not offer an opinion either way.

Americans with family incomes of \$75,000 or more continue to offer more positive views of the law than those with lower incomes. Among Americans with annual family incomes of less than \$75,000, the balance of opinion is negative (48% disapprove, 31% approve), while views of those with higher incomes are more divided (49% approve, 41% disapprove).

Partisan views of the bill are also similar to those measured just after its passage: 72% of Republicans and Republican-leaning independents say they approve of the tax legislation, compared with just 12% of Democrats and Democratic leaners.

Republicans are somewhat divided along ideological lines. A 79% majority of conservative Republicans say they approve of the bill, while a narrower majority (61%) of moderate or liberal Republicans say the same. Among Democrats, there are no significant differences in these views by ideology.

## Partisans remain divided over the 2017 tax law

*% who \_\_\_ of the tax law passed by Donald Trump and Congress last year*

Note: Don't know responses not shown.

## Methodology

The analysis in this report is based on telephone interviews conducted September 18-24, 2018 among a national sample of 1,754 adults, 18 years of age or older, living in all 50 U.S. states and the District of Columbia (439 respondents were interviewed on a landline telephone, and 1,315 were interviewed on a cell phone, including 829 who had no landline telephone).<sup>1</sup> The survey was conducted by interviewers under the direction of Abt Associates. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Survey Sampling International, LLC. Interviews were conducted in English and Spanish. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older. For detailed information about our survey methodology, see <http://www.pewresearch.org/methodology/u-s-survey-research/>.

The combined landline and cell phone sample is weighted using an iterative technique that matches gender, age, education, race, Hispanic origin and nativity and region to parameters from the 2016 Census Bureau's American Community Survey one-year estimates and population density to parameters from the Decennial Census. The sample also is weighted to match current patterns of telephone status (landline only, cell phone only, or both landline and cell phone), based on extrapolations from the 2016 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size among respondents with a landline phone. The margins of error reported and statistical tests of significance are adjusted to account for the survey's design effect, a measure of how much efficiency is lost from the weighting procedures.

---

<sup>1</sup> Due to a programming error, 37 respondents who were interviewed on a landline phone were not asked about the presence of a cellphone in their household. To account for this error, these cases were imputed as having both a landline and a cellphone, which is the most common status for landline respondents.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

---

*Survey conducted September 18-24, 2018*

<b>Group</b>	<b>Unweighted sample size</b>	<b>Plus or minus ...</b>
Total sample	1,754	2.7 percentage points
Rep/Lean Rep	755	4.2 percentage points
Dem/Lean Dem	843	3.9 percentage points
Registered voters	1,439	3.0 percentage points
Support/Lean Rep	647	4.5 percentage points
Support/Lean Dem	707	4.3 percentage points

---

Sample sizes and sampling errors for other subgroups are available upon request.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Pew Research Center undertakes all polling activity, including calls to mobile telephone numbers, in compliance with the Telephone Consumer Protection Act and other applicable laws.

Pew Research Center is a nonprofit, tax-exempt 501(c)(3) organization and a subsidiary of The Pew Charitable Trusts, its primary funder.

<sup>6</sup> In July 2018, question was preceded by the following question, "As you may know, the Trump administration recently increased tariffs or fees on imported goods from a number of countries. In response, some of these countries, including China and Canada, have increased tariffs on American goods. How much, if anything, have you heard about these tariffs between the U.S. and some of its trading partners?"
