RECOMMENDED CITATION

Pew Research Center, February 2020, "As Economic Concerns Recede, Environmental Protection Rises on the Public's Policy Agenda"

About Pew Research Center

Pew Research Center is a nonpartisan fact tank that informs the public about the issues, attitudes and trends shaping America and the world. It does not take policy positions. It conducts public opinion polling, demographic research, content analysis and other data-driven social science research. The Center studies U.S. politics and policy; journalism and media; internet, science and technology; religion and public life; Hispanic trends; global attitudes and trends; and U.S. social and demographic trends. All of the Center's reports are available at www.pewresearch.org. Pew Research Center is a subsidiary of The Pew Charitable Trusts, its primary funder.

How we did this

For this report on the public's policy agenda for the current year, we surveyed 1,504 U.S. adults by telephone in January 2020. The surveys were conducted in both English and Spanish over the phone under the direction of Abt Associates. Respondents to this survey were randomly selected via a combination of landline and cell phone random-digit-dial samples. To ensure that the results of this survey reflects a balanced cross section of the nation, the data are weighted to match the U.S. adult population by gender, age, education, race and ethnicity and other categories.

Here are the [questions used for the report](#), along with responses, and its [methodology](#).

As Economic Concerns Recede, Environmental Protection Rises on the Public's Policy Agenda

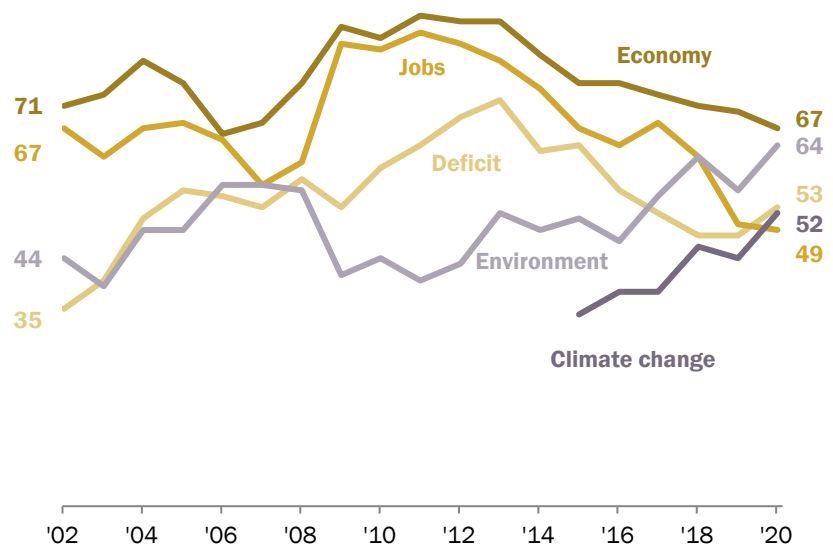

Partisan gap on dealing with climate change gets even wider

Reflecting a strong U.S. economy, Americans' policy priorities have changed in recent years. The public now places less priority on economic and job concerns than it did just a few years ago. At the same time, environmental protection and global climate change are rising on the public's agenda for the president and Congress.

For the first time in Pew Research Center surveys dating back nearly two decades, nearly as many Americans say protecting the environment should be a top policy priority (64%) as say this about strengthening the economy (67%).

For the first time, environmental protection rivals the economy among the public's top policy priorities

% who say ___ should be a top priority for the president and Congress

Source: Survey of U.S. adults conducted Jan. 8-13, 2020.

PEW RESEARCH CENTER

In addition, while a smaller share (52%) rates dealing with global climate change as a top priority, this is 14 percentage points higher than just three years ago. Today, similar shares rate climate change and improving the job situation (49%) as top policy priorities for President Donald Trump and Congress. Three years ago, 68% said jobs were a top priority, compared with just 38% who named climate change.

The public's concerns about jobs and the economy have decreased as perceptions of the national economy have improved. (For more on economic attitudes, see [“Views of Nation's Economy Remain Positive, Sharply Divided by Partisanship.”](#))

While environmental concerns have increased overall, partisanship continues to be a major factor in attitudes about the environment and climate change. Since 2017, virtually all the increase in the share of Americans saying global climate change should be a top priority has come among Democrats. Still, members of both parties are more likely to rate protecting the environment a top policy priority than did so a year ago, though this continues to be a much higher priority for Democrats than Republicans.

The national survey by Pew Research Center, conducted Jan. 8-13 on cellphones and landlines among 1,504 adults, finds that defending the country against terrorism remains a top priority among the public overall, as has been the case since 2002. Currently, 74% say defending the country from future terrorist attacks should be a top priority for the president and Congress this year – the highest of the 18 items included in the survey.

Defending against terrorism is followed by strengthening the economy, reducing health care costs and improving education, each of which is named as a top policy priority by 67% of the public. Nearly as many say that protecting the environment (64%) and taking steps to make Social Security financially sound (63%) should be top policy priorities.

The issue of climate change highlights the deep partisan divides in views of many public priorities. Dealing with global climate change ranks at the bottom of the list of 18 policy priorities for Republicans and Republican-leaning independents (just 21% call it a top priority). By contrast, climate change is near the top of the list of issues among Democrats and Democratic leaners (78% call it a top priority).

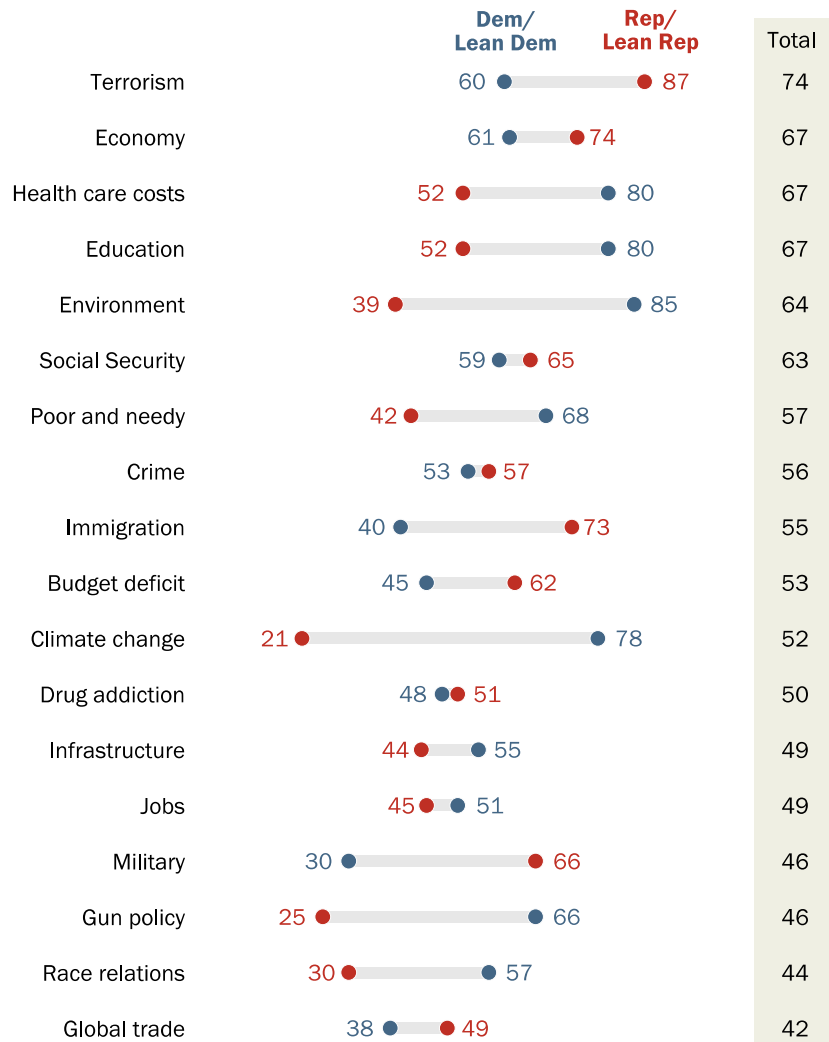

Large majorities of Democrats also place top priority on protecting the environment (85%), reducing health care costs (80%) and improving the educational system (80%). For Republicans, no more than about half rate these issues top priorities. And there is a sizable divide on the importance of addressing gun policy: Democrats are roughly 40 percentage points more likely than Republicans to view this as a top priority for the president and Congress (66% vs. 25%).

Among Republicans, defending the country from terrorist

attacks (87%) ranks as the leading policy priority for the president and Congress, followed by strengthening the economy (74%) and dealing with the issue of immigration (73%). By contrast, about six-in-ten Democrats rate strengthening the economy (61%) and defending against

Wide partisan gaps on climate change, environment, guns and stronger military

Source: Survey of U.S. adults conducted Jan. 8-13, 2020.

PEW RESEARCH CENTER

terrorism (60%) as top priorities; fewer than half say this about dealing with immigration (40%). Republicans also are much more likely than Democrats to say strengthening the U.S. military should be a top priority for the president and Congress (66% vs. 30%).

Changing views of the environment and climate change

Over the past year, both Republicans and Democrats have become more likely to say protecting the environment should be a top priority.

However, when it comes to dealing with global climate change, Democrats place greater importance on the issue than they did a year ago, while views among Republicans have not changed.

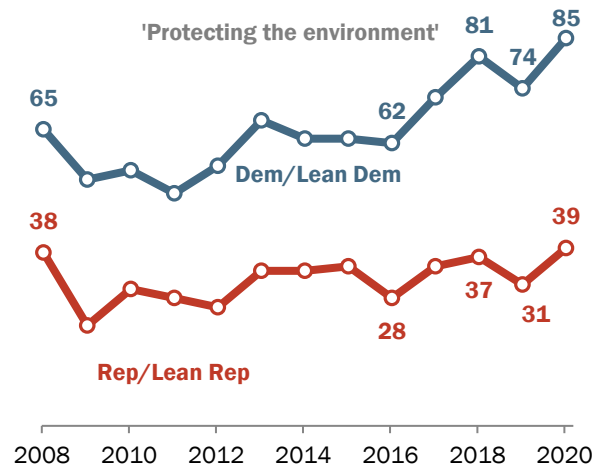

Overall, 85% of Democrats say protecting the environment should be a top priority for the president and Congress, up 11 percentage points from the share who said this in 2019. Fewer than half as many Republicans (39%) rate environmental protection as a major priority; still, this is up 8 points since last year and is the largest share of Republicans saying this in Pew Research Center surveys over the past decade.

Democrats and Republicans have long been far apart in their views of the importance of climate change. But the differences are now wider than ever: 78% of Democrats say addressing this issue is a top priority, up from 67% who said this last year. By contrast, the relatively small share of Republicans who say addressing climate change is a top priority (21%) is unchanged from a year ago.

Over the past several years, climate change has increased markedly as a policy priority among Democrats. In 2015, 46% of Democrats said it was a top priority, ranking it among the lower half of Democrats' priorities for the president and Congress. Since then, the share of Democrats rating it as a major priority has increased more

Environment rises as a priority, but partisan gap persists

% who say ___ should be a top priority for the president and Congress

PEW RESEARCH CENTER

than 30 points; today it is in the top tier of Democrats' policy concerns, along with environmental protection, health care costs and education.

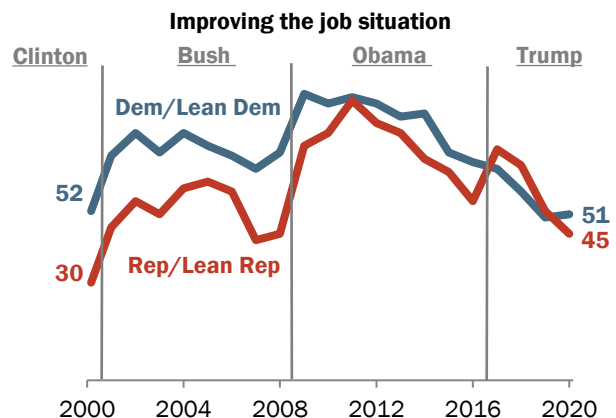

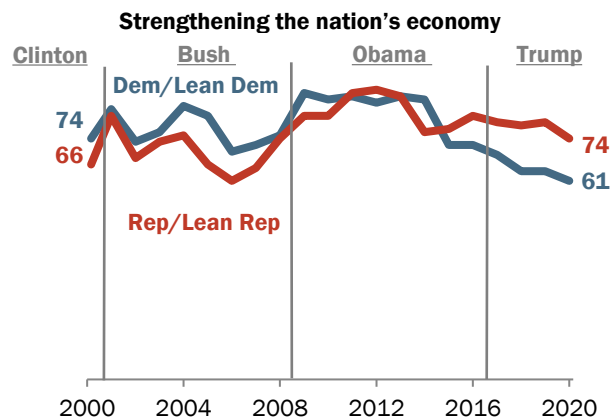

Long-term declines in the shares rating economic concerns as priorities

In 2011, 88% of Republicans and 87% of Democrats said strengthening the economy was a top priority for the president and Congress. Since then, there has been a gradual decline in the shares of both groups who place top priority on the economy, though the decline has been somewhat steeper among Democrats. In the current survey, the share of Democrats who say strengthening the economy is a top priority is down to 61%, while the share of Republicans who say this has fallen to 74%.

The priority placed on improving the job situation also has fallen sharply among partisans in the last decade. Overall, 51% of Democrats and 45% of Republicans say strengthening the job situation is a top priority for the president and Congress. In 2011, large majorities of both groups (87% and 86%, respectively) saw this as a top priority.

Far fewer in both parties say jobs a top priority than said this a decade ago

% who say ___ should be a top priority for the president and Congress

Source: Survey of U.S. adults conducted Jan. 8-13, 2020.

PEW RESEARCH CENTER

Currently, deficit reduction (53% top priority) ranks close to climate change as a mid-tier public priority. Among the public overall, concern over the deficit is down sharply from the start of Barack Obama's second term (73% called it a top priority in 2013).

The nation's debt and annual budget deficit have continued to increase in recent years, with the overall debt load exceeding the nation's gross domestic product. Yet in both parties, reducing the budget deficit has declined as a priority since 2013. Currently, 62% of Republicans and 45% of Democrats say reducing the budget deficit should be a top priority for the president and Congress.

Deficit reduction has declined as a policy priority since Obama's presidency

PEW RESEARCH CENTER

Age and gender differences in policy priorities

The policy priorities of younger and older Americans differ in several key respects. Older people are more likely to prioritize a range of issues such as strengthening the military and making the Social Security system financially sound. On the other hand, younger people are more likely to prioritize environmental issues.

A majority of adults ages 50 and older (57%) say strengthening the military should be a top priority for the president and Congress. Fewer of those ages 30 to 49 (42%) rate this as a top priority, as do just 28% of those under 30.

The age differences are nearly as stark in views of keeping Social Security financially sound. Majorities of those older than 30 say this should be a top priority, compared with 46% of those younger than 30.

Several other policy priorities – including reducing crime, cutting the budget deficit and defending the nation against terrorism – also are viewed as top priorities by larger shares of older adults than by young people.

Environment a top priority for younger adults; older Americans prioritize defense, Social Security

% who say ___ should be a top priority for Trump and Congress this year

PEW RESEARCH CENTER

By contrast, Americans under the age of 30 are more likely to prioritize protecting the environment (77% vs. 55%), improving the educational system (74% vs. 59%) and dealing with climate change (61% vs. 45%) than are older Americans.

Women are more likely than men to prioritize a range of policy goals, particularly dealing with gun policy and addressing global climate change.

While a 56% majority of women say dealing with gun policy is a top priority, only about a third of men (36%) say the same. And women are 16 percentage points more likely than men to say that dealing with global climate change should be a top policy priority (60% vs. 44%).

Larger shares of women than men also prioritize reducing health care costs, dealing with the problems of the poor and needy, improving the job situation and protecting the environment.

For their part, men are slightly more likely than women to prioritize reducing the budget deficit (57% vs. 49%), dealing with immigration (59% vs. 51%) and dealing with global trade (46% vs. 38%).

Women are more likely than men to prioritize gun policy, climate change

PEW RESEARCH CENTER

Public's policy priorities: 2012-2020

There have been sizable changes in the public's policy priorities since 2016 and 2012, the previous presidential election years.

Economic concerns have declined since 2012, when the unemployment rate was more than [double its current level of 3.6%](#).

The share of Americans who say improving the job situation is a top priority has declined by 33 percentage points since 2012 and 15 points since 2016. Similarly, while an overwhelming share of the public (86%) cited strengthening the economy as a major priority in 2012, and 75% did so four years later, that has now fallen to 67%.

Over the same period, protecting the environment has risen on the public's

agenda. In 2012, 43% of Americans rated this as a top priority. Today, more than six-in-ten (64%) do so. And 49% of Americans now say improving the country's roads, bridges and public transportation systems should be a top priority, up from 30% in 2012.

Yet the public's views of several priorities have shown little change during the past eight years. Currently, nearly three-quarters of Americans (74%) say defending against terrorism should be a top priority; this is comparable to shares saying this in 2016 (75%) and 2012 (69%). And there

Nearly half now say improving U.S. infrastructure is a top policy priority, up since 2012

PEW RESEARCH CENTER

have been only modest changes in the shares rating strengthening Social Security as a top priority over this period.

Methodology

The analysis in this report is based on telephone interviews conducted January 8-13, 2020, among a national sample of 1,504 adults, 18 years of age or older, living in all 50 U.S. states and the District of Columbia (301 respondents were interviewed on a landline telephone, and 1,203 were interviewed on a cellphone, including 839 who had no landline telephone). The survey was conducted by interviewers under the direction of Abt Associates. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Survey Sampling International LLC. Interviews were conducted in English and Spanish. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older. The weighting procedure corrected for the different sampling rates. For detailed information about our survey methodology, see <http://www.pewresearch.org/methodology/u-s-survey-research/>.

The combined landline and cell phone sample is weighted using an iterative technique that matches gender, age, education, race, Hispanic origin and nativity and region to parameters from the Census Bureau's 2018 American Community Survey one-year estimates and population density to parameters from the decennial census. The sample also is weighted to match current patterns of telephone status (landline only, cell phone only, or both landline and cell phone), based on extrapolations from the 2018 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size among respondents with a landline phone. The margins of error reported and statistical tests of significance are adjusted to account for the survey's design effect, a measure of how much efficiency is lost from the weighting procedures.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

Survey conducted January 8-13, 2020

Group	Unweighted sample size	Weighted %	Plus or minus ...
Total sample	1504		3.0 percentage points
Half sample	At least 746		4.2 percentage points
Rep/Lean Rep	696	42	4.3 percentage points
Half sample	At least 339		6.2 percentage points
Dem/Lean Dem	660	45	4.5 percentage points
Half sample	At least 320		6.4 percentage points

Sample sizes and sampling errors for other subgroups are available upon request.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Pew Research Center undertakes all polling activity, including calls to mobile telephone numbers, in compliance with the Telephone Consumer Protection Act and other applicable laws.

Pew Research Center is a nonprofit, tax-exempt 501(c)(3) organization and a subsidiary of The Pew Charitable Trusts, its primary funder.

ASK ALL

Q.60 Now, I'd like to ask you about priorities for President Trump and Congress this year. As I read from a list, tell me if you think each should be a top priority, important but lower priority, not too important or should it not be done. (First,) should **[INSERT ITEM; RANDOMIZE; OBSERVE FORM SPLITS]** be a top priority, important but lower priority, not too important, or should it not be done? What about... **[INSERT ITEM]?** **[REPEAT AS NECESSARY TO BE SURE RESPONDENT UNDERSTANDS SCALE: should this be a top priority, important but lower priority, not too important, or should it not be done?]**

		Important				(VOL.)
		Top priority	but lower priority	Not too important	Should not be done	
SUMMARY TABLE						
f.F1	Defending the country from future terrorist attacks	74	19	5	2	*
o.F2	Strengthening the nation's economy	67	27	4	1	1
e.F1	Reducing health care costs	67	26	4	4	*
h.F1	Improving the educational system	67	26	4	2	1
d.F1	Protecting the environment	64	24	8	3	1
q.F2	Taking steps to make the Social Security system financially sound	63	32	3	1	1
r.F2	Dealing with the problems of poor and needy people	57	35	5	2	*
c.F1	Reducing crime	56	34	7	2	1
n.F2	Dealing with the issue of immigration	55	26	11	5	2
